GT4U SYSTEMS LIMITED

**HERNIS CCTV EXPLOSION
PROOF AND IP CAMERAS
ALLOWS FOR CENTRALISED
MONITORING FROM ONE
CONTROL STATION, PROVIDING
COMPLETE OVERSIGHT OF ALL
AREAS AND PROCESSES ON
SHIPS, OILRIGS, PRODUCTION
PLANTS AND REFINERIES.**

COMPANY BACKGROUND

GT4U SYSTEMS LIMITED is a national services and maintenance for **HERNIS CCTV** since 2012. Founded in 2005, GT4U has continued to focus on innovation, ethical business practices and meeting customer needs, helping it to become one of the most source after for the services and maintenances of all Hernis CCTV for Africa

GT4U was incorporated in 2005. The company was formed after a successful operation of CCTV Cameras for Oil and Gas Bert Operation Platform (BOP) in 2012

The company has channeled its resources towards the training of her personnel and purchase of necessary equipment for her operations both in intallations and maintenance.

The director in person of Mr Sylvanus Olatunbosun Gansallo, was trained by Hernis and have worked in most of the projects the company handled as a consultant contractor for Quad Production Technology, where he was further trained by Cooper-Hernis among the first Hernis-OEM in Nigeria. Beacause of his passion for effectiveness and efficiency, he decided to establish the maintenance & services of Hernis CCTV for GT4U Systems .

The company, GT4U Systems Limited became a certified **HERNIS AUTHORISED SERVICE AGENT** for CCTV infrastructure utilized within the oil and gas exploration and production process. Our drive in services and maintaining in innovation technologies for your benefit and our national base make us uniquely positioned to locally serve even the most remote facilities.

Our Brands

When you are working on a multi-million dollar construction project, you need a partner that can support you with tried-and-tested systems as well as a full service and support package from initial system definition through to design and service. We are dedicated to maximizing your facility's equipment by offering comprehensive range of innovation and integrated surveillance systems designed for explosive atmospheres and harsh industrial and marine environments.

We have teamed up with our partners to design and provide best-in-class solutions for any of Hernis CCTV services and maintenance security systems. We offer complete turnkey security package: an award winning product line, exceptional engineering talent to install, operate and maintain and perform project commissioning. We provide CCTV, Fiber Optics, Solar Panels Solution, VSAT, and Wireless Radio Communication. We are also a member of The International Rope Access Trade Association Level 1-2 (IRATA) and we have qualified personnel to perform any IRATA SOW effectively and efficiently.

HERNIS is a world leading brand for high quality **Closed Circuit Television (CCTV)** Systems. Characterized by low installation and maintenance costs and unrivalled durability, the systems are tailor-made for hazardous and corrosive environments providing safety to both people and equipment.

Technology by itself is meaningless

The goal is to harness technology to open new

Markets, to improve quality of life, to uplift

Society and create value for all

Ex285T Thermal

PT40 Camera Station

Onshore

The company has pioneered the services and maintenances of the integration of CCTV with other systems including process control and fire, gas and intruder alarms, thereby providing systems suited for onshore installations within the production plant and petroleum industry. Our services and maintenances are renowned for high quality.

Offshore

Our services can maintain, whether it is basic CCTV systems, explosion – proof signalling and alarms or the surveillance and monitoring of drilling.

Marine

We services marine vessels. From LNG/LPG tankers to offshore, support vessels from cruise ships to Naval Vessels. Built to resist the most corrosive and explosive environments, the HERNIS CCTV, signalling and alarms communication systems can be designed to suit any required specification.

We provide a complete suite of customized physical security solutions and products to both the Oil and Gas and Production Plants companies in Nigeria, West Africa and other African countries.

The System

CCTV

With a wide range of Cooper Hernis cameras and software applications providing weatherproof, explosion proof, and IP cameras, both fixed and PTV solutions, designed for durability and reliability. We provides Integrated Intelligent Security Solutions Products with Video Analytics, Fibre Optics, Radar and IP Camera systems, (CCTV) for Monitoring Oil & Gas Production Platforms, Gas Plants, Pipelines, Drilling Rigs, and Offices within Telecommunication Infrastructure/ Platforms.

We provides underwater cameras with ROV capabilities for video observation and inspection of offshore construction and installations of well head, pipelines, risers, umbilical and platform decommissioning.

Installation of solar panels at the well head platform to provide power for the underwater cameras, and the wireless radio for video streaming. With our solutions and experience we can fulfil your specification requirements.

Engineering Services

Commissioning

As part of our standard commissioning services, we not only arrange factory site acceptance tests but once the solutions are installed, we ensure they are once again subjected to engineering tests to guarantee full, immediate functionality.

Training

In order to ensure the benefits of the solutions are fully utilized we can provide your team the necessary training for any application. GT4U want your staff to feel competent and confident that the solutions conform to your requirements.

Technical Support

In the case that additional support is required after installation, GT4U is available for service and onsite technical support to make certain that any issue is resolved effectively and efficiently.

MISSION STATEMENT

Our mission is to deliver premier, quality and efficient engineering services of international standard to satisfy our clients.

We will meet this goal through;

- The complete analysis of project requirements, utilizing trained and experienced personnel with strong emphasis on quality.
- The application of latest cutting-edge technology and utilizing modern techniques in all our operations.
- Maintaining a goal oriented corporate culture that will win the trust of our employees and help us serve our clients better.
- The demonstration of a team-work spirit with emphasis on honesty and integrity.
- Total commitment to our employees, clients, communities we operate in and the environment.

COMPANY POLICIES

HEALTH SAFETY AND ENVIRONMENT POLICY

The policy is to maintain the highest standard for the safety and health of all Company's employees and to conduct all activities with appropriate safeguards against exposures of the general public to risk.

To meet these criteria, the Company provides and maintains safe and healthy working conditions through;

- Safe work procedures, emergency procedures and risk assessment procedures for every job.
- Adherence of company operations in accordance with international and governmental requirements for protection of the environment.
- Special training of company employees for operation of special equipment.

MOTTO: THINK SAFE – DIVE SAFE – WORK SAFE

QA / QC POLICY

GT4U SYSTEMS LIMITED is keenly aware that quality and continuous improvement is of paramount importance to our Clients and the Industries in which we operate.

The Company Management has therefore introduced the implementation of quality concepts and programs consistent with ISO 9001 Quality processes.

To ensure our Customers (Clients) receive the most cost-effective services, GT4U Systems Ltd has developed a comprehensive Quality Manual and Community Affairs, Safety Health & Environment Policy (CASHES).

ENGINEERING AND TECHNICAL SERVICES

OIL FIELD OPERATIONS:

INSTALLATION, CONSTRUCTION, MAINTENANCE, INSPECTION AND COMMISSION (ABS INSPECTIONS)

- RISERS
- CABLE LAYING
- INSPECTION
- FPSO MAINTENANCE

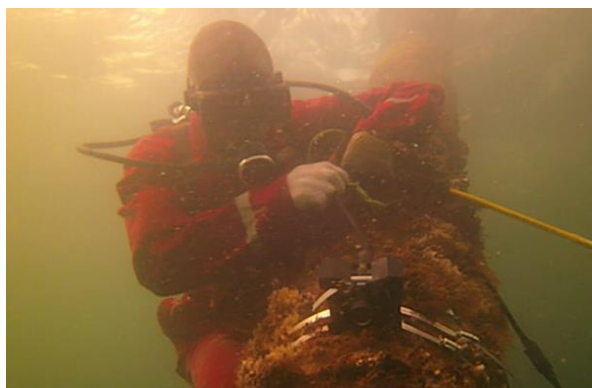

Project: HERNIS CCTV , CHEVRON

Location: Agbami Vessel facilities

CCTV PIPELINES MONITORING

- UNDERWATER INSPECTION/MAINTENANCE
- UNDERWATER CCTV MONITORING
- UNDERWATER VIDEO CAPTURING
- INSTALLATION OF SOLAR PANELS ON WHP AS MAIN SOURCE OF POWER
- POINT TO POINT WIRELESS RADIO FOR UNDERWATER VIDEO STREAMING.

Armada Perkasa, Okoro field AFREN.
